

The 16-suite hospice residence will be the first inpatient hospice unit in Brooklyn, and one of the few in New York to serve both children and adults. This unique facility will redefine hospice care by offering children and families a home away from home without sacrificing the best in medical care. The Metropolitan Jewish Health System, a leader in providing hospice care, is making this happen.

You'll notice the difference even before you enter the building. Menorah Home's serene natural setting and soothing ocean views provide a sense of tranquility at every turn. Unlike other facilities, the suites will be spacious and private. In addition to the patient's bedroom, suites will include a kitchenette and living area, creating a comfortable, homelike atmosphere where families can just be families. With warm, natural light streaming through plentiful skylights, the many common spaces such as a family room, dining area, library and resource room allow loved ones to further experience a natural home life together.

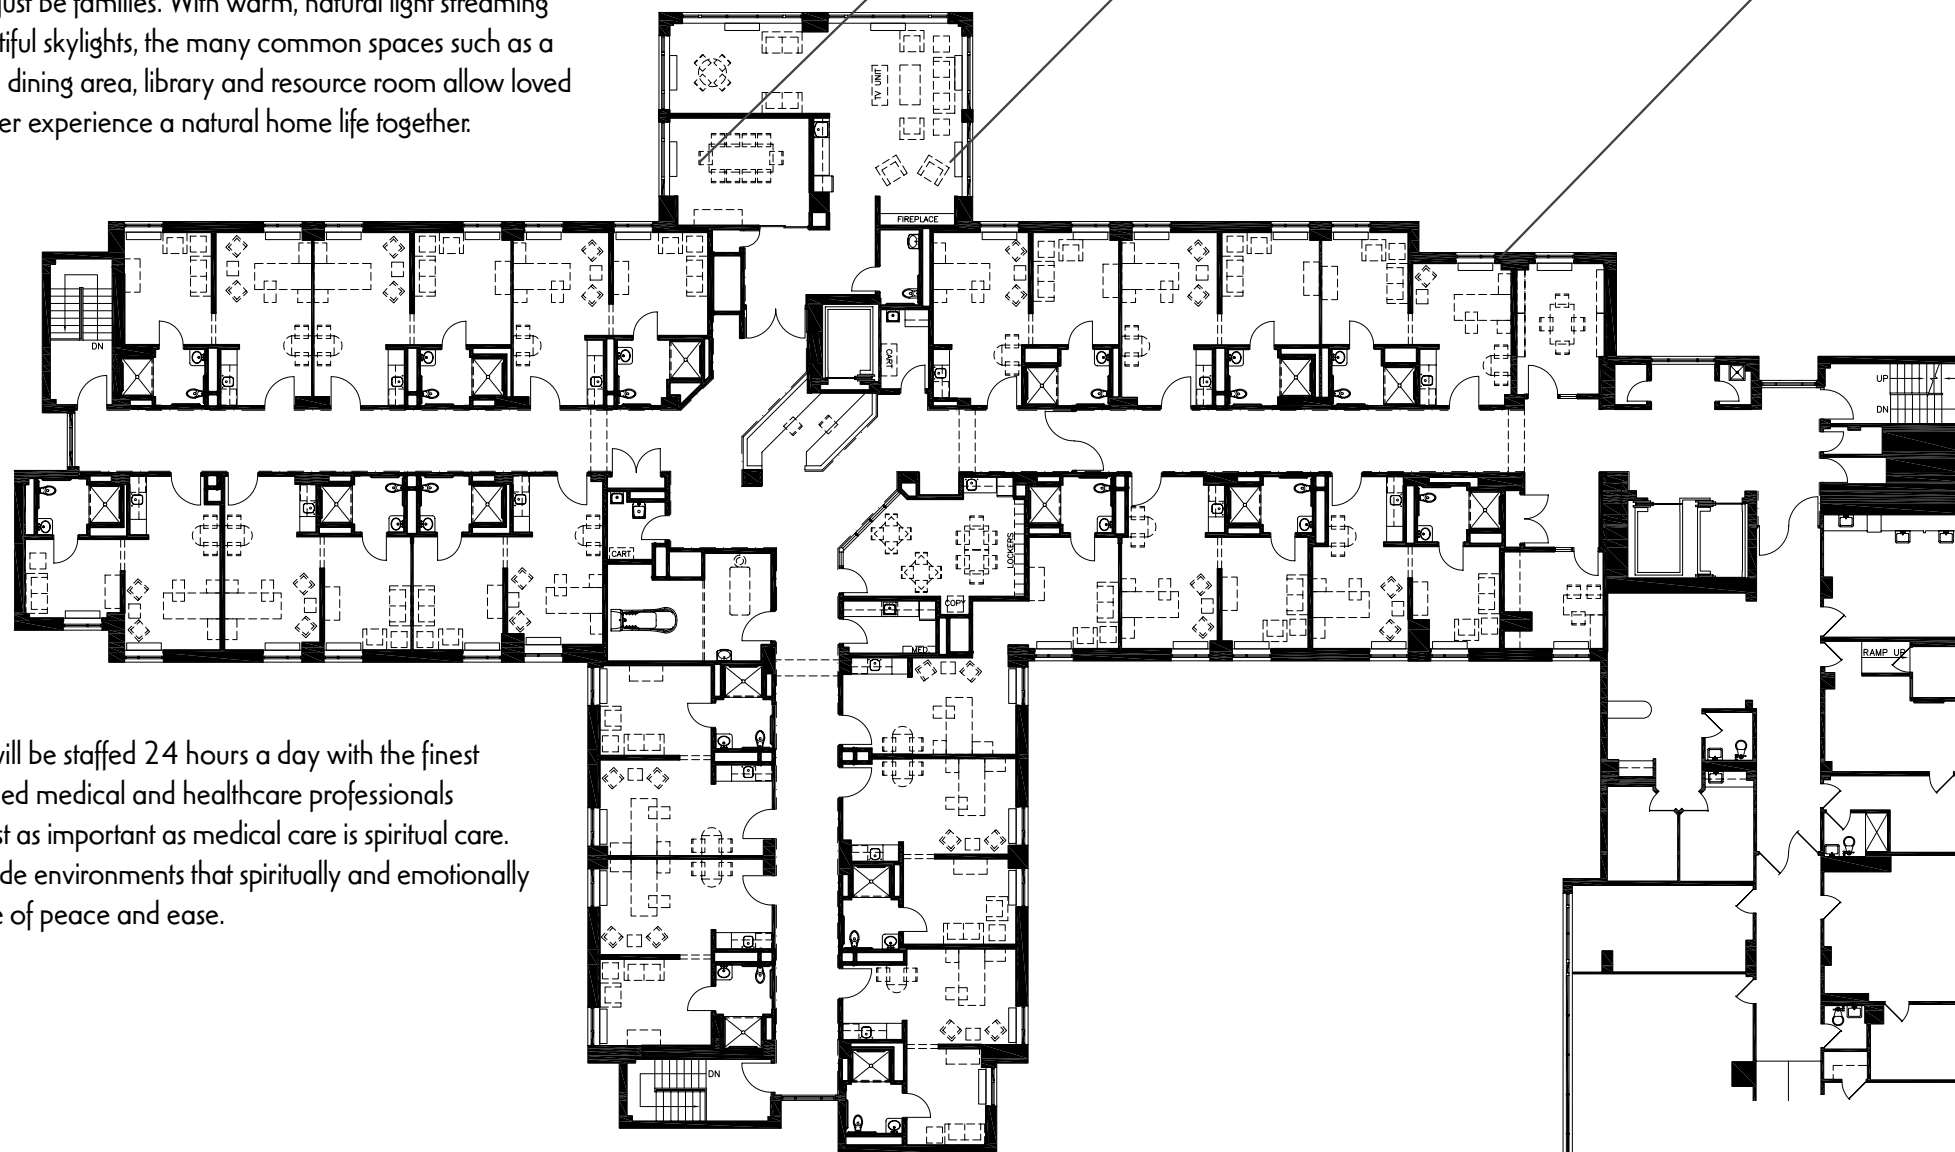

DINING ROOM

LOUNGE

PRIVATE APARTMENT

The facility will be staffed 24 hours a day with the finest board-certified medical and healthcare professionals available. Just as important as medical care is spiritual care. We will provide environments that spiritually and emotionally bring a sense of peace and ease.

Additional care includes:

- Pain and symptom management, including PCA pumps and IV interventions
- Daily evaluation by board-certified hospice physicians
- Round-the-clock RNs board-certified in hospice and palliative care
- 24-hour Hospice Home Health Aides to provide personalized care and support
- Integrative Medicine — whole-body approach that treats the person, not just the disease, by focusing on the mind, body and spirit
- Spiritual counselors for individuals of all faiths
- Creative music and arts therapy
- Personalized lifestyle (residents can set their own schedules)
